Quality of Higher Education - Yihuan Zou 2022-09-01

Quality in higher education was not invented in recent decades - universities have always possessed mechanisms for assuring the quality of their work. The rising concern over quality is closely related to the changes in higher education and its social context. Among others, the most conspicuous changes are the massive expansion, diversification and increased cost in higher education, and new mechanisms of accountability initiated by the state. With these changes the traditional internally enacted academic quality-keeping has been given an important external dimension - quality assurance, which requires higher education institutions to continuously demonstrate and improve performance, and which also provides new systems of rewards and sanctions. However, the complex impacts of quality assurance policies have shown a need to further understand the quality issue in higher education. This book is about constructing a more inclusive understanding of quality in higher education through combining the macro, meso and micro levels, i.e. from the perspectives of national policy, higher education institutions as organizations in society, individual teaching staff and students. It covers both theoretical

constructions for understanding quality and empirical investigation in the Chinese context. The questions addressed are: How is quality of higher education perceived by the institution, teaching staff and students, respectively? What are the main concerns for the institution, teaching staff and students in their own pursuit of quality? It has been concluded that quality of higher education is not only about educational quality, but also about expanding life chances for the students, prosperity in the administrative system for the teaching staff, and organizational prosperity for the institution. With regard to quality assurance and accountability in higher education special attention should be given to the values pursued and be careful to balance between immediate, single-value efficiency and sustainable development and a wider-range of values that higher education serves.

**The Governor's Four Hearts** - James Earp 2011

I continued an emotional battle with God. I pleaded with Him to allow David to live so he could be a daddy to Tatum and to take me. My life was marginal anyway. Why couldn't He let Dave live and take me? When James Earp was diagnosed with heart failure, he assumed he wouldn't have long to live. He had no idea that he would be offered a new lease on life while watching his son David's slow battle with cancer. As James struggled with his and his son's health crises, he both questioned and found comfort in his faith. In this inspirational story, James talks candidly about finding hope and healing in the midst of tragedy and learning once again how to really live. 'I remember my first discussion with Mr. and Mrs. Earp like it was yesterday. I could see in both of their eyes that Mr. Earp had so much to do in his life, so much to give, that there was no other option than to keep up the fight. This book, *And The life of the Earp family*, Is a saga of hope and love that we can all embrace and from which we all can learn.' Dan M. Meyer, M.D. The Sarah M. and Charles E. **Translanguaging in Higher Education** - Catherine M. Mazak 2016-12-09

This book examines translanguaging in higher education and provides clear examples of what translanguaging looks like in practice in particular contexts around the world. While higher education has historically been seen as a monolingual space, the case studies from the international contexts included in this collection show us that institutions of higher education are often translanguaging spaces that reflect the multilingual environments in which they exist. Chapters demonstrate how the use of translanguaging practices within the context of global higher education, where English plays an increasingly important role, allows students and professors to build on their linguistic repertoires to more efficiently and effectively learn content. The documentation of such practices within the context of higher education will further legitimize translanguaging practices and may lead to their increased use not only in higher education but also in both primary and secondary schools.
