Ethical and Methodological Issues in Researching Young Language Learners in School Contexts - Annamaria Pinter 2021-05-10
This book focuses on ethical and methodological issues faced by researchers working with young language learners in formal school contexts. It uncovers and explicitly discusses a range of ethical dilemmas, challenges and experiences that researchers have encountered and grappled with, in studies of all kinds from large scale, experimental studies to ethnographic studies focused on just a handful of children. The chapters are written by researchers working with children in different classroom contexts around the world and highlight how ethical dilemmas and tensions take on a complex form in child-focused research, requiring researchers to pay particular attention to the social and cultural norms of the different communities within which children are educated as well as their school-based experiences. The book comprises three sections, with the first part focused on involving children as active participants in research; part two on ethical challenges in multilingual contexts and part three on links between teacher education and researching children. The book includes a critical discussion of the opportunities and challenges associated with applying the UNCRC (1989) document in second language research

with children which will be of use to any researcher working in this area.

Assessing the Language of Young Learners - Angela Hasselgreen 2016-10

This volume offers new insights into the assessment of the language of Young Learners (YLS). YLS are defined here as being from 5 to 17 years, and are treated as three distinct subgroups: younger children (5/6 to 8/9 years), older children (8/9 to 12/13 years) and teenagers (12/13 to 17 years). The first half addresses fundamental issues, beginning with the characteristics of YLS and how these are manifested in first language development. The authors consider the potential ability of each age group to perform in a second or foreign language, proposing a rough age-related correspondence with CEFR levels. Finally, principles of assessment, specifically formative

assessment and testing, are presented in the light of linguistic, cognitive and social development. The second half focuses on testing a range of 'skills'. Theoretical models of performance are introduced, followed by a practical analysis of approaches to the testing of each skill for the three age groups, illustrated with examples. The authors conclude by summing up developmental characteristics of each age group, and their implications for language testing. The book is intended for a wide readership within the field of teaching and assessing the language of young learners. Researchers are offered scope for further investigation of what emerges from the discussion, while practitioners will hopefully find support in their day-to-day work with YLs.

Everybody Worries - Jon Burgerman 2020-04-30
Even the bravest of the brave and the coolest of the cool worry. Worrying is normal when so much has changed. Inspired by conversations with his parent friends who weren't sure how to explain what is happening right now to their small children, artist and writer Jon Burgerman decided to do something to help. I decided to write a book about worry and stress and how normal it is and how we can try and mitigate it. I think we might not acknowledge that small children worry as much as they do. Without a means of expressing their anxieties the stress can manifest and have adverse effects. It's important to talk openly about what is going on and that the feelings we're experience are being felt by a lot of people, and that by sharing and caring for each other we can try and make it a little better.

How Children Learn - John Holt 2009-04-20
From the preface by Deborah Meier: "We have a long way to go to make John Holt's dream available to all children. But his books make it possible and easier for many of us to join him in the journey." In this enduring classic, rich with deep, original insight into the nature of early learning, John Holt was the first to make clear that, for small children, "learning is as natural as breathing." In his delightful book he observes how children actually learn to talk, to read, to count, and to reason, and how, as adults, we can best encourage these natural abilities in our children.
