## **The Korean Automotive Industry, Volume 1** - A. J. Jacobs 2022

In 1962, South Korea assembled just 1,100 new automobiles. By 1996, this total had soared to 2,812,714. What explains this remarkable growth? The answer is complex, and involves a combination of a supportive State, timely technology alliances, a skilled but historically low-paid workforce, aggressive pricing, savvy entrepreneurs, and fortuitous circumstances. Despite this amazing ascent, comparatively little has been written about the Korean auto industry in English. In the first of a two-volume set, this 11-chapter book seeks to help fill this void by providing in-depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time (without knowledge of the Asian Fiscal Crisis), the book should prove informative to practitioners, scholars, and students interested in automotive history, international political economy, Asian studies, and more. A.J. Jacobs is Professor of Sociology at East Carolina University, USA.

## *Talent Management in Global Organizations* - Marina Latukha 2018-09-29

This book explores the implications of talent management in four practical settings across the globe. Focusing on countries in the Asia-Pacific region, Central and Eastern Europe, Latin America and within the Commonwealth of Independent States (CIS), the authors illustrate how multinational corporations (MNCs) can benefit from talent management practices and as a result, develop a strategy of organizational leadership. Offering empirical examples from each region, this book examines how economic and cultural contexts influence talent management. Talent Management in Global Organizations discusses successful cases in different cross-cultural settings, and aims to inspire companies around the world to develop and implement talent management practices effectively.

**How to Build Max-Performance Mopar Big Blocks** - Andy Finkbeiner 2009

Naturally aspirated Mopar Wedge big-blocks are quite capable of producing between 600 to 900 horsepower. This book covers how to build Mopar's 383-, 400-, 413-ci, 440-ci engines to these power levels. Discussed is how to select a stock or aftermarket block for the desired performance level. The reciprocating assembly is examined in detail, so you select the right design and material for durability and performance requirements. Cylinder heads and valve train configurations are crucial for generating maximum horsepower and torque and this volume provides special treatment in this area. Camshafts and lifters are compared and contrasted using hydraulic flat tappet, hydraulic roller and solid flat tappet cams. Also, detailed engine builds at 600, 700, 800, and 900 horsepower levels provide insight and reveal what can be done with real-world component packages.

Andreas and the Ambiguity of Courtly Love - Paolo Cherchi 1994

A resolution to the vexed problem whether a troubadour's love is erotic or spiritual is offered by Paolo Cherchi through a new reading of Andreas Capellanus' *De Amore* (written around 1186-1196). He suggests that Andreas, using a rhetorical strategy that creates ambiguity, condemns courtly love because its claim

that passion generates virtue is untenable and deceitful. Although Andreas grasped the core of the courtly love 'system,' namely, the relation between passion and ethics, he failed to consider the notion of *mezura*, that courtly virtue through which troubadours transformed nature into culture, and erotic passion into social discourse. Cherchi offers an innovative interpretation and a close reading of selected poems. He traces the history of Provençal lyric poetry, highlighting some of the significant personalities and movements.

*Popular Culture and the Transformation of Japan-Korea Relations* - Rumi Sakamoto 2020-06-11

This book presents essays exploring the ways in which popular culture reflects and engenders ongoing changes in Japan-Korea relations. Through a broad temporal coverage from the colonial period to the contemporary, the book's chapters analyse the often contradictory roles that popular culture has played in either promoting or impeding nationalisms, regional conflict and reconciliations between Japan and Korea. Its contributors link several key areas of interest in East Asian Studies, including conflicts over historical memories and cultural production, grassroots challenges to state ideology, and the consequences of digital technology in Japan and South Korea. Taking recent discourse on Japan and South Korea as popular cultural superpowers further, this book expands its focus from mainstream entertainment media to the lived experience of daily life, in which sentiments and perceptions of the "popular" are formed. It will be

useful to students and scholars of Japanese and Korean studies, as well as film studies, media studies and cultural studies more widely.

**The Mobility Revolution** - Lukas Neckermann 2015-04-28

We stand at the cusp of a mobility revolution unlike anything we have seen since the days of Gottlieb Daimler and Henry Ford, 130 years ago. Three massively significant and converging automotive trends - electrification, self-driving technology and car-sharing - will together transform the way we live, work, and move about in our increasingly urban environment. This book coins the term 'Mobility Revolution' and is a summary of the 'three zeroes' that are already defining the future for the automobile industry: Zero Emissions, Zero Accidents and Zero Ownership. The impact will go beyond the automotive industry and its suppliers - urban infrastructure, construction, logistics - and even local cafés will need to think and operate differently. Based on countless interviews, the book is highly current and thoroughly researched, whilst also fun to read. It is an eye-opener to the new world that awaits us as the Mobility Revolution unfolds. The Mobility Revolution is a must-read for anyone interested in the future of the automobile industry, our cities, and the way we live.
