Public Administration in Great Britain - Omar Guerrero-Orozco
2015-07-12

In the study of public administration, it is conventional to focus on the cases of Germany and France. These two countries are considered exemplar models of the evolution of public administration. Germany stands out due to the quality of its public service and training in public administration, whereas France enjoys a celebrated reputation earned by its intendants (quartermasters) and policies of centralization. In contrast, Great Britain tends to appear less attractive of a case and with minor contributions to the field, despite the prestige achieved by its civil service (usually considered inferior to the German and French). Similarly, its administrative thought is commonly perceived as underdeveloped and unsubstantial. Naturally, these perspectives originate from a poor understanding of the evolution of British administration. Therefore they tend to be based on wrong and biased interpretations. On the contrary, Great Britain offers a fascinating case, as the hidden secrets of its public administration provide a wide and stimulating research agenda. Motivated by the entrenched misunderstanding of the British administration, I researched the topic extensively and published a book entitled *La Administración Pública en Gran Bretaña* (Public Administration in Great Britain) in 2012. This book draws together historical evidence about the compelling trajectory of

administrative thought in Great Britain, and provides a novel perspective to understanding public administration in the country. I believe that this book fills an important gap in the literature, and does justice to the eminent British thinkers that have been ignored or forgotten, even in the English literature.

The Future of Public Administration around the World - Rosemary O'Leary 2011-01-04

A once-in-a-generation event held every twenty years, the Minnowbrook conference brings together the top scholars in public administration and public management to reflect on the state of the field and its future. This unique volume brings together a group of distinguished authors—both seasoned and new—for a rare critical examination of the field of public administration yesterday, today, and tomorrow. The book begins by examining the ideas of previous Minnowbrook conferences, such as relevance and change, which are reflective of the 1960s and 1980s. It then moves beyond old Minnowbrook concepts to focus on public administration challenges of the future: globalism, twenty-first century collaborative governance, the role of information technology in governance, deliberative democracy and public participation, the organization of the future, and teaching the next generation of leaders. The book ends by coming full circle to examine the current challenge of remaining relevant. There is no other book like this—nor is there ever

likely to be another—in print. Simply put, the ideas, concepts, and spirit of Minnowbrook are one-of-a-kind. This book captures the soul of public administration past, present, and future, and is a must-read for anyone serious about the theory and practice of public administration.

The Administrative State - Dwight Waldo 2017-09-04

This classic text, originally published in 1948, is a study of the public administration movement from the viewpoint of political theory and the history of ideas. It seeks to review and analyze the theoretical element in administrative writings and to present the development of the public administration movement as a chapter in the history of American political thought. The objectives of The Administrative State are to assist students of administration to view their subject in historical perspective and to appraise the theoretical content of their literature. It is also hoped that this book may assist students of American culture by illuminating an important development of the first half of the twentieth century. It thus should serve political scientists whose interests lie in the field of public

administration or in the study of bureaucracy as a political issue; the public administrator interested in the philosophic background of his service; and the historian who seeks an understanding of major governmental developments. This study, now with a new introduction by public policy and administration scholar Hugh Miller, is based upon the various books, articles, pamphlets, reports, and records that make up the literature of public administration, and documents the political response to the modern world that Graham Wallas named the Great Society. It will be of lasting interest to students of political science, government, and American history.

In this book, Michael Barzelay tackles the challenge of making public management into a true professional discipline. Barzelay argues that public management needs to integrate contrasting conceptions of professional practice. Many examples, from the basic to the cutting-edge, show how the theory is used in the design of modern systems and the relevance of this theory will motivate students. The theory is supported by practical algorithms so that the student can perform computations and simulations. Leading edge topics in coding and wireless communication make this an ideal text for students taking just one course on the subject. *Fundamentals of Digital Communications* has coverage of turbo and LDPC codes in sufficient detail and clarity to enable hands-on implementation and performance evaluation, as well as 'just enough' information theory to enable computation of performance benchmarks to compare them against. Other unique features include space-time communication and geometric insights into noncoherent communication and equalization.

[Social Equity and Public Administration: Origins, Developments, and Applications](#) - H George Frederickson 2015-02-12

This book is designed to be the definitive statement on social equity theory and practice in public administration. Social equity is often referred to as the "third pillar" in PA, after efficiency and economy. It concerns itself with the fairness of the organization, its management, and its delivery of public services. H. George Frederickson is widely recognized as the originator of the concept and the person most associated with its development and application. The book's introduction and chapters 1-4 offer general descriptions of social equity in terms of its arguments and claims in changing political, economic, and social circumstances, and trace the development of the concept over the past forty years. Chapters 5-9 provide applications of social equity theory to particular policy arenas such as education, or to specific public

administration issues such as the range of administrative discretion, the legal context, the research challenges, and social equity in the context of time and generations. Chapters 10 and 11 describe the current state of social equity and look towards the future.

Democracy and Public Management Reform - Luiz Carlos Bresser-Pereira 2004-10-07

Building the Republican State is an insightful analysis of the new state and the new public management that is emerging in the twenty-first century. It presents the historical stages that led to the modern state, identifies a crisis of the nation-state and its origins in a fiscal crisis and in globalization, and situates public management in the last phase - the social-liberal and republican state. To understand such stages the author develops the theory of republican rights, as a fourth type of citizenship right, after the civil, the political, and the social rights. The book contains an original model of reform, in which the roles of the state, the forms of ownership, the types of public administration, and the organizational-institutions indicated in each situation are put together. Additionally, the book discusses the political theories behind the reform, and its political implications. Throughout the book, the author underlines the complementary roles of markets and the state, and the importance of building state capacity to assure administrative efficiency, always having in count the 'democratic constraint', i.e., the prevalence of the political over the economic realm. This is essential reading both for those studying political theory and government reform, as well as for anyone interested in state politics and globalization.

[SOCRATES](#) - Dr. Hoff Maarten 2016-12-02

Editorial We are living in an era of digitization thus moving towards a digital government. The use of ICT in public-administration is beneficial

and it is not mere a coincidence that the top 10 countries in e-government implementation (according to UN E-Government Survey 2016) are flourishing democracies. There has been a sharp rise in the number of countries using e-government to provide public services online through one stop-platform. According to the 2016 survey, 90 countries now offer one or more single entry portal on public information or online services, or both and 148 countries provide at-least one form of online transaction services. More and more countries are making efforts through e-government to ensure and increase inclusiveness, effectiveness, accountability and transparency in their public institutions. Across the globe, data for public information and security is being opened up. The 2016 survey shows that 128 countries now provide data-sets on government spending in machine readable formats. E-government and innovation seems to have provided significant opportunities to transform public administration into an instrument of sustainable development. The governments around the globe are rapidly transforming. The use of information and communication technology in public administration - combined with organizational change and new skills- seems to be improving public services and democratic processes and strengthening support to public policies. There has been an increased effort to utilize advanced electronic and mobile services that benefits all. Fixed and wireless broadband subscriptions have increased unevenly across regions, with Europe leading, but Africa still lagging behind. We have to focus on these substantial region disparities and growing divide. All countries agreed, in SDG 9, that a major effort is required to ensure universal access to internet in the least developed countries. The rise of Social media and its easy access seems to have enabled an increasing number of countries moving towards participatory decision making, in which developed European countries are among the top 50 performers. But, the issues of diminishing collective thinking and rising Individual thinking are some rising issues that we will have to deal with in the future. There are more sensitive issues like the new classification of citizens into literate-illiterate, e-literate and e-illiterate, that the governments need to look upon. It is a good sign that many

developing countries are making good progress. Enhanced e-participation can support the realization of the SDGs by enabling more participatory decision making, but the success of e-government will ultimately depend upon our ability and capability to solve the contrasting issues raised due to this transition with sensitivity. In this issue of SOCRATES we have discussed, this new era of Digital Government. We have focused on what we have learned from the past and the future we want. From discussions on the role of e-governance within the local government settings in a modern democratic state to the experience of an academia with online examination, we have tried to include every possible aspect of e-government. Paper authored by Dr. Hoff Maarten, aims to outline the role of e-governance within the setting of a local government in a modern democratic state. It is agreed that a local governmental organization needs to be fit for the purpose of serving its citizens. Fits can be tested both through universally acknowledged principles, and drivers that suit modern on-demand organizations. Paper authored by Mr. Alsaeed Abraheem and Dr. Carl, proposes a conceptual framework which captures the main factors (both enablers and barriers) influence and contributes toward a successful implementation of eServices in countries that have unstable status. The paper draws upon Osborn and Gaebler's work, 'reinventing government', which identifies 10 principles of government transformation. This is used to examine eGov examples in the case of Syria along with previous work covering barriers and enablers to eGov activities within countries that have unstable status. The resulting derived conceptual framework provides a base to understand eGov activity for nations going through geopolitical uncertainty. Paper authored by Mr. Saurabh Chandra highlights the initiatives taken by the Governments in India at various levels to modernise their processes and functions for delivery of information and services to the citizens, using the Information and Communication technology [ICT]. It also highlights E-Government uptake in different parts of the world, highlighting its need in India, as in developing countries like India, there is no comprehensive data on actual e-government uptake on a global scale. Paper authored by Mr. Peter Asare-

Nuamah and Mr. Darko Emmanuel Agyepong highlights the various legal policies and framework that support e-governance in Ghana as well as the challenges of implementing e-governance initiatives. The findings of the study indicate that several policies and frameworks support e-governance in Ghana but their implementations are burdened with social, cultural, political and legal constraints. The study provides some recommendations that are necessary to tackle the challenges of e-governance implementation. Paper authored by Mr. Ojo Patrick highlights battling sub-Saharan African countries. The perspective in this paper is that the emergence of democratic governments in this region occurred through lopsided process which impacts on their governance structures. Consequently, the institutionalization of liberal democracy has been omitted; the absence of which creates gaps between aspiration for and struggle by African people for democracy on the one hand, and the actual performance of democratic governments on the other hand. The paper identifies structural deficiencies in the current pattern of governance as the political missing link in the value chain between democracy and development in the region. The paper recommends e-governance; an administrative process that guarantees good governance through accountability and transparency, as the necessary connecting link and panacea to bridging the observable existing gaps. Paper authored by Dr. Nandita Kaushal highlights the Plausibility of E-Governance as a Public Service Delivery Mechanism in India. It argues that there is no doubt, wherever e-governance projects have been conceived, designed and implemented with due regard to the needs of the people there positive outcomes have been visible. However, it has to be acknowledged that most of the projects are facing multiple challenges which are reducing their success rate. It recommends serious consideration to all the issues which are hampering their efficiency. At the same time it suggests measures that must be taken up to maintain the human face of these initiatives. Paper authored by Dr. Inderjeet Singh Sodhi reviews the achievements and progress of e-government in India. The paper briefly discusses various e-government projects in India. The purpose of the paper is to delve into policy and issue of the

government of India in making e-government accessible to the common person. It briefly identifies the strategic issues for achievement of e-government. This paper derives a list of key strategic factors that are appropriate for planning, designing, development and implementation of e-government. The paper identifies the range of diverse problems, challenges and barriers planners and developers must face as they work in the e-government projects. The paper discusses prospects and future of e-government in India. The paper highlights the role of government to develop richer and deeper understanding of e-government. Paper authored by Ms. Shreyasi Ghosh attempts to trace the essence of e-government in the modern era of Indian Public Administration today as another new paradigm shift is in the offspring and slowly becoming distinct from the amorphous shape of Public Administration in the Indian context with the ICT-blessed governance, or e-Governance. Paper authored by Ms. Stuti Saxena probes the OGD platform using a qualitative and quantitative lens. This paper shows that OGD usage is popular among the end-users in terms of the number of views and downloads of the datasets. Future research might undertake the empirical investigation of the research hypotheses advanced in the paper. Paper authored by Dr. Jyotirmoy W. Singh is developed by a contributor who has been a national and International online examiner for past six or more years. This paper is based on his experience. It seeks to compare the traditional mode of examination with that of the online examination in citing the mode of High School Leaving Examination of Board of Secondary Education Manipur and International Baccalaureate Organisation (IBO) examination as case studies. I wish scholars and potential readers will find this issue useful. We will bring more special issues focused on e-government and other various dimensions of governance in the near future. The Fundamentals of Public Personnel Management - J. Cheminais 1998

Government and those executing its policies face the daunting task of

delivering essential services to a dispossessed and hugely disadvantaged electorate. The authors of *The Fundamentals of Public Personnel Management* argue that, although the state controls a wide range of limited resources, only the effective management and judicious administration of its primary asset, its personnel, will allow it to translate physical, financial, material and technological resources into synergistic founts of national well-being. Trained and motivated public employees schooled in the ethics of their profession are essential to transforming inanimate structures and resources into people-oriented dispensers of sustainable service delivery.
