The GPVTS Guide to Success - Lucy Blunt
2011-04-07

This invaluable guide to the GPVTS supports trainees from the process of application, through to qualification and beyond. Written by a recently qualified general practitioner, it combines a frank and friendly approach with a wealth of insider knowledge to guide the trainee through each stage of the training process. It not only features real-life case studies from those in training or who have recently completed training but also gives handy hints and tips on how to avoid some of the common trainee pitfalls. This first hand account aims to guide trainees through all the highs and lows of training and practising as a GP plus everything inbetween.

Revision Questions for Paediatrics - Olamide Orekunrin 2010

This revision tool helps readers strengthen their existing knowledge of childhood disorders through Extended Matching Questions (EMQs) on topics frequently asked in Paediatrics examinations, ranging from neonatology to emergency medicine and public health. Detailed answers in each section build comprehension and knowledge. Many medical schools now examine undergraduates using EMQs, but they also feature highly in postgraduate examinations. This revision aid will therefore also be useful to those preparing for postgraduate examinations such as the Diploma

of Child Health (DCH) and Membership of the Royal College of Paediatrics and Child Health (MRCPCH), as well as foundation doctors on their first paediatric rotations and all those wishing to consolidate their knowledge and understanding of Paediatrics.

Electroporation-Based Therapies for Cancer - Raji Sundararajan 2014-08-28

Electroporation-Based Therapies for Cancer

reviews electroporation-based clinical studies in hospitals for various cancer treatments, including melanomas, head and neck cancers, chest wall breast carcinomas, and colorectal cancers, as well as research studies in the lab using cell lines, primary cells, and animals. Cancer kills about one American per minute, amounting to over 500,000 deaths in the United States and millions, worldwide, each year. There is a critical need for safe, effective, and affordable alternative treatment modalities, especially for inoperable, recurring, and chemo-resistant cancers, that do not respond well to current treatment regimen. An electrical-pulse-mediated, enhanced drug delivery technique known as electroporation is one way to effectively treat these patients. This technique is especially suitable for low- and middle-income countries, where lack of infrastructure and resources leads to cancer diagnoses at late stages. This quick, safe, effective, economical, out-patient-based technique is a boon to these patients for palliative and other care with enhanced quality of life. This book features discussions by interdisciplinary authors—including practicing oncological surgeons, medical professionals, and academic and other researchers—of the basics and clinical medical applications of electroporation. Provides novel and recent clinical applications of electrochemotherapy for various cancers, including melanomas, sarcomas, superficial extreme melanoma, chest wall breast carcinoma, and colorectal cancers Extensive study of a number of cell lines, including human breast cancer, lung cancer, cervical cancer, leukemia, and mouse breast cancer using both reversible and irreversible electroporation techniques In vitro study of delivery of various commonly prescribed/administered breast cancer chemo and hormone drugs, such as Doxorubicin, Paclitaxel, Bleomycin, and Tamoxifen

History for the IB Diploma Paper 2

Evolution and Development of Democratic States (1848-2000) - Jean Bottaro 2015-12-03 Comprehensive second editions of History for the IB Diploma Paper 2, revised for first teaching in 2015. Child Health Nursing - Jane W. Ball 2018-04-23 For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the

latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Kenya National Assembly Official Record (Hansard) - 1963-07-23

The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya, the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya.
Learning to Consult - Rodger Charlton
2018-10-08

Information is vital for healthcare professionals striving to keep their practice current and based on the best available evidence. The Internet is playing an increasingly crucial role in life long learning of health professionals and is becoming the most practical way to access publications on clinical guidelines systematic reviews and for updating users about the key aspects of health policy. This book covers the diversity and variable value of material available on the Internet and takes a fresh approach to coping with information overload. It illustrates how simple techniques such as making and using smart maps concept maps and mind maps can help clinicians keep up-to-date and how these methods can be applied to particular areas of healthcare. It provides numerous case studies in key areas including mental health child health primary care and care of the elderly. Mapping Health on the Internet is essential reading for all

healthcare professionals and will assist in their learning and continuing professional development.

1500 Questions for the Dch/ Mrcpch Foundation of Practice Exam - Farah Alam 2016-11-28

The principal aim of this book is to provide a rigorous and challenging set of practice questions for candidates to revise and prepare for the DCH/MRCPCH Foundation of Practice exam, for the Royal College of Paediatricians, UK, and will prove a useful tool for preparation for the Diploma of Child Health. It is divided into five practice papers containing sixty stems with five multiple-choice true/false questions each. Detailed explanations of the answers have been provided to aid understanding and knowledge. This will be an invaluable asset to candidates aiming to reach the standard required for core specialist training, and for general practitioners with a special interest in paediatrics. It will also be useful for GP's, doctors and nurses wishing to maintain their basic knowledge in paediatrics, as part of their continuing professional development.

From an Association to a Royal College - Alan Craft 2017-03-21

This book describes the history of the Royal College of Paediatrics and Child Health (RCPCH) covering the period from 1988 to 2014, which includes the transition from the British Paediatric Association (BPA) to the formation of the now established RCPCH. The book contains a collection of viewpoints from paediatricians who held officer posts with the association and College through this time. The authors offer insights and reflections to help the reader understand where the College is at the moment on a variety of core paediatric issues, and significantly where it has come from. The formation of the RCPCH from the BPA was very controversial, with some members resigning from the RCP. Since then, the College has come a long way and is now recognised as the definitive body to speak for children's health in the UK and has forged relationships with many overseas countries. It has produced influential documents, and lobbied for advances in the practice of paediatrics. It has reported on standards for how children should be cared for in emergency and urgent care settings, launched policy to improve how children are looked after in the secure estate, and produced teaching and training materials for child protection among many other contributions to child health. Finally, it will be of interest to other Colleges and professional bodies as well as to Members and Fellows of the College.

MRCPCH 1 Questions with Individual Subject Summaries - R. M. Beattie 2011

Reflecting the latest exam formats, this book provides essential revision for those taking the Paediatric Membership exams - MRCPCH Papers 1a and 1b, and DCH diploma. Features over 500 completely up-to-date questions. Includes subject-based chapters for focussed revision. Includes all question formats likely to be encountered in the exam - BOF, MCQs and EMQs. Contains expanded answers to every question, helping students build understanding

and confidence for success. Written by experienced, practising Paediatric Specialist Registrars, and edited by renowned author R Mark Beattie.

Fully indexed, it provides details on all university awards and over 200 career fields, their professional and accrediting bodies, levels of membership and qualifications. It lists all degree and postgraduate awards from all UK universities and colleges, and includes website addresses for each establishment.

MRCPCH 1 - Mark Beattie 2009

Royal Society of Medicine Career Handbook:

FY1 - ST2 - Muhunthan Thillai 2011-04-29

Doctors often lack the skills needed to give them a competitive edge over their colleagues.

Despite being academically gifted they leave medical school after six years ill equipped to attain their own career goals. Management skills that are often the most basic to those working for private companies are left out of their undergraduate training. Some simple tips, strategies and well researched advice will empower doctors to develop their own unique career pathway and help them achieve success in their professional life. This book is for all newly qualified doctors. It systematically and logically examines the entire hospital doctor and GP career process from start to finish, dispelling common myths and advising doctors on how to break down their career into sections and tackle them one at a time. Planning a career should be like sitting an exam. Each chapter is devoted to one aspect of the career pathway from how to choose the right job for you through to FY1, FY2 and ST jobs, and covering application forms,

exams, the interview process, audit and finally publications. This book helps to answer specific questions such as: Should I apply for jobs in multiple deaneries to increase my chances of success? What do those questions on the application form really mean? Exactly what type of questions will come up in my interview? Which postgraduate exam should I choose, how will I get through it and when should I sit it? How can I excel in an audit and make a difference to my department? How do I get published and which journals should I choose? Brimming with sound practical advice, hints, tips with its readily accessible style and approach, this text is an essential purchase for all doctors embarking on their career.

The Foundation Programme - Mark Welfare 2007-01-01

It is a practical, illustrated guide to the Foundation Programme, introduced throughout the UK to regulate and standardise the two-year training of newly qualified doctors. It provides specific information on how to apply for a Foundation post, the curriculum, assessment methods, and maintaining a portfolio, as well as reviewing the pros and cons of the various medical specialities which doctors can pursue after the Foundation years. The authors address issues of concern to all groups involved in the Foundation programme - trainees, trainers and senior doctors - and gives concrete examples of completed documentation and assessment. Helps UK and overseas doctors in choosing and applying for their Foundation Programme. Helps trainees and trainers understand the curriculum, the teaching and learning methods, and the use of the portfolio. Explains the various assessment procedures including the 'RITA' (Record of In-Training Assessment) and gives examples. Helps trainees manage their learning and pass their assessments. Informs trainers - including consultants and GPs - about the purpose of the Foundation Programme and how to use the less-familiar assessment tools.

So You Want to be a Brain Surgeon? - Simon Eccles 2009

This book is aimed at the trainee doctor deciding what to specialise in. It contains contributions from experts in a wide range of medical specialties offering information on the medical paths they have chosen and what it's like to

work in each area.

The Journal of the Royal College of General Practitioners - 1983

Communities in Action - National Academies of Sciences, Engineering, and Medicine 2017-04-27
In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Resources in Education - 1998

Essential Questions in Paediatrics for MRCPCH.
- R. M. Beattie 2004

This companion book to Volume 1 contains chapters on Infectious Diseases, Metabolic Medicine, Neonatology, Neurology, Ophthalmology, Respiratory, Rheumatology and Statistics.

Making it in British Medicine - Sabina Dosani 2018-08-08

Gone are the days when you present to colleagues with hand-drawn overheads. *Presenting Health with PowerPoint* shows how you can work through PowerPoint to create effective presentations. In an easy-to-use step-by-step format it takes you through the

components of the European Computer Driving Licence the basic IT qualification and guides you through the text by showing what actually appears on the computer using screenshots toolbar icons mouse and keyboard actions. The accompanying CD-ROM provides downloadable resources and useful website links. Presenting Health with PowerPoint is designed for doctors nurses and managers at all levels throughout primary and secondary care who need not have prior knowledge of Microsoft PowerPoint.

The Essential Revision Guide to Paediatric Cardiology - Rebecca Casans 2021-12-17

A unique reference book covering the relevant basic sciences of cardiac anatomy, physiology and pharmacology through to the initial clinical assessment and investigation. It covers the core curricula for paediatricians in training at all levels including the MRCPCH and DCH examinations. This book is relevant to paediatricians in training, general practitioners, emergency department staff and specialist nurses. General staff working in specialist regional cardiac centres and healthcare professionals involved in the care of children and

young people will also find this essential resource extremely useful. 'The aim of this handbook is to provide a rapid and reliable reference to congenital and acquired cardiac problems. It is very well organised. provides a more detailed discussion of cardiac physiology and pathophysiology and a comprehensive guide to ECG interpretation. It should be of particular interest to paediatricians in training, including those studying for higher professional examinations, but it also provides a valuable source of reference for paediatricians already in practice.' From the Foreword by Dr Christopher Wren

Paediatrics: Key Questions Answered - Jonathan Round 1999-01-21

Paediatrics: Key Questions Answered has been designed for the student in clinical medicine to learn and revise paediatrics. Taking an integrative approach, this book covers the undergraduate medical curriculum and the Diploma of Child Health. There are more than 200 key questions testing knowledge, data interpretation, and reasoning skills and the book includes full answers with additional learning points.
