The Investment Answer - Gordon Murray

2011-01-12

What if there were a way to cut through all the financial mumbo-jumbo? Wouldn't it be great if someone could really explain to us-in plain and simple English-the basics we must know about investing in order to insure our financial freedom? At last, here's good news. Jargon-free and written for all investors-experienced, beginner, and everyone in between-The Investment Answer distills the process into just five decisions-five straightforward choices that can lead to safe and sound ways to manage your money. When Wall Street veteran Gordon Murray told his good friend and financial advisor, Dan Goldie, that he had only six months to live, Dan responded, "Do you want to write that book you've always wanted to do?" The result is this eminently valuable primer which can be read and understood in one sitting, and has advice that benefits you, not Wall Street and the rest of the traditional financial services

industry. The Investment Answer asks readers to make five basic but key decisions to stack the investment odds in their favor. The advice is simple, easy-to-follow, and effective, and can lead to a more profitable portfolio for every investor. Specifically: Should I invest on my own or seek help from an investment professional? How should I allocate my investments among stocks, bonds, and cash? Which specific asset classes within these broad categories should I include in my portfolio? Should I take an actively managed approach to investing, or follow a passive alternative? When should I sell assets and when should I buy more? In a world of fast-talking traders who believe that they can game the system and a market characterized by instability, this extraordinary and timely book offers guidance every investor should have.

Steps To Knowledge: The Book of Inner Knowing - Marshall Vian Summers 2013-09-28

Steps to Knowledge: The Book of Inner Knowing
Steps to Knowledge is the Book of Inner Knowing. Its one-year study plan, which is divided into 365 "steps," or lessons, is designed to enable students to learn to experience and to apply their Self-Knowledge, or Spiritual Power, in the world. Steps to Knowledge sets out to accomplish this task in a step-by-step manner as students are introduced to the essential ideas and practices which make such an undertaking possible. Practicing every day provides a solid foundation of experience and develops the thinking, perception and self-motivation necessary for both worldly success and spiritual

advancement. Steps to Knowledge describes Knowledge in the following way: "Knowledge represents your True Self, your True Mind and your True Relationships in the universe. It also possesses your greater calling in the world and a perfect utilization of your nature, all of your inherent abilities and skills, even your limitations, all to be given for good in the world." (Step 2) Knowledge is the deeper spiritual mind that the Creator has given to each person. It is the source of all meaningful action, contribution and relationships. It is our natural Inner Guidance system. Its reality is mysterious, but its Presence can be directly experienced. Knowledge is remarkably wise and effective in guiding each person in finding his or her right relationships, work and contribution. It is equally effective in preparing one to recognize the many pitfalls and deceptions that exist along the way. It is the basis for seeing, knowing, and acting with certainty and strength. It is the foundation of life. Steps to Knowledge has been

provided as a Way for individuals who feel that a spiritual calling and purpose are emerging in their lives, but who need a new approach to fully comprehend what this means. Often these individuals have felt this pull for a long time. Steps provides a foundation upon which they can begin to respond to this calling. The only entrance requirement is the determination to know one's purpose, meaning and direction.

Creating Competitive Advantage - Jaynie L. Smith 2006-04-25

Why should I do business with you... and not your competitor? Whether you are a retailer, manufacturer, distributor, or service provider – if you cannot answer this question, you are surely losing customers, clients and market share. This eye-opening book reveals how identifying your competitive advantages and trumpeting them to the marketplace is the most surefire way to close deals, retain clients, and stay miles ahead of the competition. The five fatal flaws of most companies: ? They don't have a competitive advantage but think they do ? They have a competitive advantage but don't know what it is—so they lower prices instead ?

They know what their competitive advantage is but neglect to tell clients about it ? They mistake “strengths” for competitive advantages ? They don’t concentrate on competitive advantages when making strategic and operational decisions The good news is that you can overcome these costly mistakes - by identifying your competitive advantages and creating new ones. Consultant, public speaker, and competitive advantage expert Jaynie Smith will show you how scores of small and large companies substantially increased their sales by focusing on their competitive advantages. When advising a CEO frustrated by his salespeople’s inability to close deals, Smith discovered that his company stayed on schedule 95 percent of the time - an achievement no one else in his industry could claim. By touting this and other competitive advantages to customers, closing rates increased by 30 percent—and so did company revenues. Jack Welch has said, “If you don’t have a competitive advantage, don’t compete.” This

straight-to-the-point book is filled with insightful stories and specific steps on how to pinpoint your competitive advantages, develop new ones, and get the message out about them. “The biggest marketing flaw in most companies is their failure to fully reap the benefits of their competitive advantages. Either they think they have a competitive advantage but don’t. Or they have one and don’t realize it. Or they know they have a strong competitive advantage but fail to promote it adequately to their customers and prospects. “In my research with middle-market companies, I found only two CEOs out of 1,000 who could clearly name their companies’ competitive advantages. The other 99.8 percent could offer only vague, imprecise generalities. These same CEOs often rely on outside consultants to guide strategic-planning sessions. Yet, in my experience, very few consultants - even seasoned ones - give competitive advantage evaluation more than a superficial glance.... “Ignoring your competitive advantages

can be an expensive and even fatal mistake. Because no matter the size of your company or the kind of business you are in, your competitive advantages should be the foundation of all your strategic and operational decisions. They're the reasons customers choose to buy from you instead of the other guy." – From Creating Competitive Advantage

Darwin-Inspired Learning - Carolyn J. Boulter
2015-01-19

Charles Darwin has been extensively analysed and written about as a scientist, Victorian, father and husband. However, this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin's life and scientific practice. The ways in which Darwin developed his scientific ideas, and their far reaching effects, continue to challenge

and provoke contemporary teachers and learners, inspiring them to consider both how scientists work and how individual humans 'read nature'. Darwin-inspired learning, as proposed in this international collection of essays, is an enquiry-based pedagogy, that takes the professional practice of Charles Darwin as its source. Without seeking to idealise the man, Darwin-inspired learning places importance on:

- active learning
- hands-on enquiry
- critical thinking
- creativity
- argumentation
- interdisciplinarity.

In an increasingly urbanised world, first-hand observations of living plants and animals are becoming rarer. Indeed, some commentators suggest that such encounters are under threat and children are living in a time of 'nature-deficit'. Darwin-inspired learning, with its focus on close observation and hands-on enquiry, seeks to re-engage children and young people with the living world through critical and creative thinking modeled on Darwin's life and science.

The Accidental Creative - Todd Henry
2013-08-27

Many of us assume that our creative process is beyond our ability to influence, and pay attention to it only when it isn't working properly. For the most part, we go about our daily tasks and everything just "works." Until it doesn't. Adding to this lack of understanding is the rapidly accelerating pace of work. Each day we are face escalating expectations and a continual squeeze to do more with less. We are asked to produce an ever-increasing amount of brilliance in an ever-shrinking amount of time. There is an unspoken (or spoken!) expectation that we'll be accessible 24/7, and as a result we frequently feel like we're "always on." Now business creativity expert Todd Henry explains how to unleash your creative potential. Whether you're a creative by trade or an "accidental creative," this book will help you quickly and effectively integrate new ideas into your daily life.

Lao Tsu, a 6th century B.C. Chinese sage and author of Tao Te Ching captures the essence of being a leadership catalyst in the following passage: With the best of leaders, When the work is done, The project completed, The people all say, "We did it ourselves."
