**Tearoom Trade** - Laud Humphreys 2017-07-12

From the time of its first publication, 'Tearoom Trade' engendered controversy. It was also accorded an unusual amount of praise for a first book on a marginal, intentionally self-effacing population by a previously unknown sociologist. The book was quickly recognized as an important, imaginative, and useful contribution to our understanding of "deviant" sexual activity. Describing impersonal, anonymous sexual encounters in public restrooms—"tearooms" in the argot—the book explored the behavior of men whose closet homosexuality was kept from their families and neighbors. By posing as an initiate, the author was able to engage in systematic observation of homosexual acts in public settings, and later to develop a more complete picture of those involved by interviewing them in their homes, again without revealing their unwitting participation in his study. This enlarged edition of 'Tearoom Trade' includes the original text, together with a retrospect, written by Nicholas von Hoffman, Irving Louis Horowitz, Lee Rainwater, Donald P. Warwick, and Myron Glazer. The material added includes a perspective on the social scientist at work and the ethical problems to which that work may give rise, along with debate by the book's initial critics and proponents. Humphreys added a postscript and his views on the opinion expressed in the retrospect.

Driving is a privilege and not a right. Drivers must drive responsibly and safely, obey traffic laws, and never drink and drive. Finally, make sure that you and your passengers are properly buckled up - it's the law! Today's vehicles are loaded with technology that was unheard of even a decade ago. Systems that warn when you are drifting from your lane, assist you in parallel parking, automatically brake in emergency situations and provide 360 degrees of vision around the vehicle via a camera are becoming standard, even on moderately priced vehicles. As remarkable as these leaps in automotive technology are, the truth is that the most important safety feature in any vehicle remains you as the driver. Therefore, it is to your benefit to continue improving and expanding your knowledge of traffic laws and safe driving practices. Driving is a privilege. Once you have been issued a driver's license, you have the responsibility to continually demonstrate the skill and knowledge to drive safely. Whether you have been behind the wheel for decades or are just starting to venture out, driving is a discipline that requires judgment, knowledge, physical and mental self-awareness, and practice. "What Every Driver Must Know" is an excellent resource for assisting

you on this lifelong journey.

**Regulatory Hacking** - Evan Burfield 2018-06-19

Named by Inc. magazine as one of the 10 Best Business Books of 2018 Every startup wants to change the world. But the ones that truly make an impact know something the others don't: how to make government and regulation work for them. As startups use technology to shape the way we live, work, and learn, they're taking on challenges in sectors like healthcare, infrastructure, and education, where failure is far more consequential than a humorous chat with Siri or the wrong package on your doorstep. These startups inevitably have to face governments responsible for protecting citizens through regulation. Love it or hate it, we're entering the next era of the digital revolution: the Regulatory Era. The big winners in this era--in terms of both impact and financial return--will need skills they won't teach you in business school or most startup incubators: how to scale a business in an industry deeply intertwined with government. Here, for the first time, is the playbook on how to win the regulatory era. "Regulatory hacking" doesn't mean "cutting through red tape"; it's really about finding a creative, strategic approach to navigating complex markets. Evan Burfield is the cofounder of 1776, a Washington, DC-based venture capital firm and incubator specializing in regulated industries. Burfield has coached startups on how to understand, adapt to, and influence government regulation. Now, in Regulatory Hacking, he draws on that expertise and real startup success stories to show you how to do the same. For instance, you'll learn how... \* AirBnB rallied a grassroots movement to vote No on San Francisco's Prop F, which would have restricted its business in the city. \* HopSkipDrive overcame safety concerns about its kids' ridesharing service by working with state government to build trust into its platform. \* 23andMe survived the FDA's order to stop selling its genetic testing kits by building trusted relationships with scientists who could influence the federal regulatory community. Through fascinating case studies and interviews with startup founders, Burfield shows you how to build a compelling narrative for your startup, use it to build a grassroots movement to impact regulation, and develop influence to overcome entrenched relationships between incumbents and governments. These are just some of the tools in the book that you'll need to win the next frontier of innovation.

Thaddeus Lamb - P. G. Smith 2018-01-11

Rev. Thaddeus Lamb is in a world of trouble. A true believer and a man of God, he is having a terrible time protecting his small town, family, and church from the ravages of social change in the sinful '70s. But like the mighty Don Quixote de la Mancha, he dares to dream the impossible dream: that a man of sufficient faith and fortitude can reverse the march of time. This, he believes, is his mission from God. Alas, it is a daunting quest. Satanic Steve, the station manager, torments him about his low TV ratings. His church is facing bankruptcy. His daughter is turning into a liberal feminist before his fundamentalist eyes, and then he is sorely tempted by a man on a crusade of his own. Roger Wright is a brilliant political strategist who intends nothing less than to reverse the direction of politics in America. Hilarious and heartbreaking, this

meditation on the turbulent decade of Nixon and Carter examines forces that divide our nation today and provides a fictionalized account of the right-wing campaign to recruit evangelical ministers into politics.
