The Scope of Epidemiological Psychiatry - Paul Williams 2018-09-24

The late Professor Michael Shepherd was one of the most eminent and respected international figures in psychiatry. His contributions to the field in general were enormous but it is probably in epidemiological and social psychiatry that his work has had the greatest influence. Originally

published in 1989, this volume of essays, written specifically in Professor Shepherd's honour, is concerned with the scientific approach to epidemiological psychiatry. The distinguished contributors, many of whom were close colleagues or former students, were drawn from a conspicuously wide range of scientific disciplines, medical and non-medical, and their contributions reflect the far-reaching applications of epidemiological methods to mental health problems.

Communicating Mobility and Technology - Ehren Helmut Pflugfelder 2016-07-07

Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies, Ehren Helmut Pflugfelder turns specifically to automobility, a term used to describe the kinds of mobility afforded by autonomous, automobile-based movement technologies and their ramifications. Thus far, few studies in technical communication have explored the development of mobility technologies, the immense power that highly structured, environmentally significant systems have in the world, or the human-machine interactions that take place in such activities. Applying kinaesthetic rhetoric, a rhetoric that is sensitive to and developed from the mobile, material context of these technologies,

Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day, open-source vehicle projects, and a large case study of an autonomous, electric pod car network that ultimately failed. Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us, often unconsciously, into regimes of movement and ways of experiencing the world. As Pflugfelder shows, mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks.

Computer-Aided Transit Scheduling - Joachim R. Daduna 2012-12-06
This proceedings volume consists of papers presented at the Sixth International Workshop on Computer-Aided Scheduling of Public Transpon, which was held at the Fund~lio Calouste Gulbenkian in Lisbon from July 6th to 9th, 1993. In the tradition of alternating Workshops between North America and Europe - Chicago (1975), Leeds (1980), Montreal (1983), Hamburg (1987) and again Montreal (1990), the European city of Lisbon was selected as the venue for the Workshop in 1993. As in earlier Workshops, the central theme dealt with vehicle and duty scheduling problems and the employment of operations-research-based software systems for operational planning in public transport. However, as was initiated in Hamburg in 1987, the scope of this Workshop was broadened to include topics in related fields. This fundamental alteration was an inevitable consequence of the growing demand over the last decade for solutions to the complete planning

process in public transport through integrated systems. Therefore, the program of this workshop included sections which dealt with scheduling problems and computerized systems for operational planning as well as sections on network planning and data management.

Computer Hardware Maintenance - Stephen Rood 1996

Computer Hardware Maintenance presents the full scope and understanding of how the PC hardware maintenance function should operate and be managed in an organization, including steps involved in containing costs, keeping records, and planning the integration of the help desk function. In today's IS department too often the PC hardware maintenance function is treated as a 'necessary evil', with the understanding that eventually all equipment will have some degree of mechanical or electrical failure. This book discusses scenarios where keeping the maintenance function internal is most viable and where having it external, from a depot service, pickup and delivery, or on-site service, is most viable. Computer Hardware Maintenance concludes with brief descriptions of available third-party systems and how emerging trends in PC hardware configuration as proposed by the Desktop Management Task Force (DMTF) will have a major impact on the PC hardware maintenance function in the future.

Interactive Language Teaching - Wilga M. Rivers 1987-02-27

In this collection of essays, a distinguished group of innovative teachers and writers describe the approaches and techniques they have incorporated into their own teaching. The articles are designed to help classroom teachers make language classes more participatory and

communication oriented. Successive articles deal with the structure of interaction in large and small groups: imaginative activities for listening, speaking, reading, writing, and testing; the use of poetry, song, and drama; how to perform grammar rules rather than recite them; the special contribution of authentic materials; using audio and video as well as computer software to enhance learning, tapping the community as a resource; learning to interact in different cultural styles; and preparing the student for real-life professional use of language. Teachers of any language and teachers in training will find in this volume a wealth of original and practical ideas for the classroom.
