MCQs and EMQs in Surgery: A Bailey & Love Companion Guide -

Christopher Bulstrode 2010-07-30

With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice of surgery as outlined within Bailey & Love. Sub-divided into 13 subject-specific sections, both MCQs and EMQs provide a comprehensive coverage of the surgical curriculum as well as the core learning points as set out in Bailey & Love: Each section emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles, while while taking into account the latest developments in surgical practice. MCQs and EMQs in Surgery is an excellent companion to Bailey & Love and provides a valuable revision tool for those studying for MRCS.

MCQs in Oral and Maxillofacial Surgery - Sonia Jindal 2011-03-14

MCQs for FRCS - Somaiah Aroori 2021-12-17

This unique collection of multiple choice questions (MCQs) is specifically written to help surgical trainee candidates prepare for Part One of the FRCS general surgery exit examination, which features MCQs on general surgery. The book helps candidates gauge the types of questions likely to

be asked and the extent of preparation required for this examination. The wide range of surgical topics covered, including general surgery and emergency surgery in addition to endocrine, vascular, upper GI, hepatobiliary, colorectal and transplant surgery, also makes it a useful revision text for MRCS examination candidates.

Lecture Notes on General Surgery - Harold Ellis 1972

McQs in General Surgery - Kefah M. Mokbel 1997

In late 1996, the format of the examinations for surgical trainees in the UK will change. The existing FRCS diploma examination will be replaced by a new MRCS (Membership of the Royal College of Surgeons) qualification. These changes will be phased in over a period of time. The first major change will be in the existing Part I Applied Basic Sciences examination, which will now consist of two MCQ papers covering both basic and clinical aspects of surgery.

Principles and Practice of Lasers in Otorhinolaryngology and Head and Neck Surgery - V. Oswal 2014-01-24

Foreword In this era's informational paradigm, while pondering the considerations to be penned in this foreword, the relevance of a text such as this emerged progressively as the focal point. After all, for years, one established source for accessing large amounts of valuable information had been the Encyclopaedia Britannica, a printed tome, which is no

longer relevant. Instant access to the latest scientific information is freely available to all with an internet. So, what can this text provide that cannot be readily accessed? In contemplating given topics, the Editors, as most certainly occurred in this publication, chose clinical authorities to author chapters in their areas of expertise. The experienced clinician often finds such a forum a unique opportunity to reflect on years of knowledge acquisition and then render an insightful discourse on the lineage of his/her current understanding of the topic. On the other side of the coin, the reader instantly acquires a knowledge base, which was validated with an exhaustive literature search and gains the senior authors' perspective of it. A less experienced author will benefit from thoroughly reviewing the currently available science and technology and moreover, gain experience in scientific writing. In the latter scenario the senior author is at once mentor and expert. Under ordinary circumstances, from the concept outline submission to a publisher, the time line to completion of the text is approximately one and a half to two years. Recruiting and assigning authors, awaiting late manuscript submissions and editing are unquestionably time consuming. Yet a passionate, dedicated Editor will take seemingly varied submissions and script them into a worthy finished product. Such was the case with this publication. The end result is a superbly structured text covering most of the concepts relating to the topic in a format that is both logical and intuitive. At the risk of some redundancy, I share with you my thoughts on some of the significant number of new additions and improvements made to this second edition. The chapter on risk management is a welcome contribution. The rationale for the shift in the current decision tree for laryngeal cancer as it relates to macro versus micro margins, improvements in voice quality and the choice of initial therapeutic considerations are appropriately vetted. The rethinking of HPV associated malignancies is a new and most important addition. Zeitels' presentation of angiolytic lasers for benign and malignant pathology is state of the art. I particularly enjoyed reading about lasers and the association with tropical diseases. The chapters on robotic surgery, non-invasive cartilage reshaping and photo-diagnostics puts the latest

technical innovation in our discipline into perspective. The excellent illustrations and photographs are a bonus. There are other areas that could be mentioned e.g. paediatrics, however, the aforementioned has more than adequately established the tenor of the text. In their quest to provide a one-stop knowledge base of a reference quality, it is inescapable that the size of the final proof would surpass the typical numbers of between four and five hundred pages for the hard bound volume. Tightening the text by removing some peripheral material would deprive the book its very objective of a reference quality publication. The obvious solution was to present the work in a set of two volumes, and the editors and the publishers have to be congratulated in achieving this seamlessly. The natural anatomical split provides the reader with a convenience of picking up the volume of relevance for the task at hand. An unusual feature is the inclusion of MCQs after each chapter, to serve as a test for recall of knowledge, the result of which can be assessed simply by going back to the chapter! The Editors and the publishers have exploited the now ubiquitous electronic media network to their advantage. Operating on various platforms a dedicated website will complement the book with updates, operative videos, and means of communication to share the knowledge globally. It was the focus of this brief foreword to explore the relevance of this text in the current informational climate. It provides the essential foundation for informed thought on this topic. Agree or disagree with the information contained within, the reader has acquired the knowledge to be able to do such. With this text you will be rewarded for sitting in your most comfortable chair, thumbing through the pages and sensing the new print. Immediately understood will be the time and effort it took to complete a text of this calibre. Read the chapters first that initially appeal to you and then without question you will read the remainder. This book should be in the library of any serious student of the subject. I feel privileged to have been asked to write the foreword. Marshall Strome

Multiple Choice Questions and Quick Review of Surgery - Ahmed ElBishry 2018

The goals of our book are to prepare students for final examinations and to prime them and young surgeons to face the real world of surgical practice. To achieve these goals, we have been listening to feedback from students and colleagues whose advice has been invaluable.

Accordingly, in this fourth edition, we have made changes in the content as well as the format. We have been warned that many eager students move to the provided adjacent answer before allowing time to solve a question on their own. The advice was to move answers to the end of each chapter. We hope this change will generate, in students, enough sense of excitement and curiosity to motivate them to think, analyze and choose the most appropriate diagnosis and management. We have made more extensive changes in the content. The number of plain MCQs has risen from 678 to 753. Two new section of clinical photographs and clinical imaging-based questions have added further 117 MCQs. Stress has been laid on more case scenario questions, with the aim of consolidating knowledge obtained from textbooks and adapting it for use under common surgical situations. We still encourage students to use this book for evaluation of their grasp of the science of surgery and for the purpose of a quick review before examinations. We hope it will be of value in this regard and that it will be as enjoyable and thought stimulating for the reader as it has been for us in the process of composing.

MCQs in Plastic Surgery - Kayvan Shokrollahi, 2009-09-01

Multiple Choice Questions in Plastic Surgery provides over 400 questions, answers and explanations covering the breadth of plastic and reconstructive surgery including burns. The expansive array of questions with detailed explanations and references will provide a solid foundation for those preparing for final specialty examinations such as the American Boards, the FRCS (Plast), EBOPRAS, MCh and others. The questions are drawn from international experts and are up-to-date with the latest concepts and techniques, including face transplantation, new trends in

reconstructive and aesthetic surgery, and recent scientific advances. It will therefore appeal to those interested in plastic surgery education globally. In particular, it will help plastic surgeons to keep up-to-date in the specialty, and demonstrate this through continuing medical education (CME) and for processes of revalidation.

300 Essential SBAs in Surgery - Kaji Sritharan 2017-11-22

Medical education and the tools used for assessment are continually evolving. Single Best Answer (SBA) questions are a relatively new method of assessment commonly encountered in final surgical exams. The key to success in any SBA-style examination is practice, practice and more practice. With nearly 300 structured questions, this book comprehensively covers the surgical curriculum. Each specialty-specific chapter contains a combination of clinical vignettes and knowledge-based questions of varying degrees of difficulty, both challenging the more able candidates as well as giving a realistic appreciation of the standard required to pass. Each question gives a detailed explanation of the correct answer to aid reflection and reinforce understanding. This book is the ideal revision aid for all undergraduate medical students preparing for their final examination in surgery. In addition, doctors studying for the Membership of the Royal College of Surgeons (MRCS) and the Professional and Linguistic Assessment Board (PLAB) examinations will also find this book extremely useful.

MCQs for FRCS - Somaiah Aroori 2011

This unique collection of multiple choice questions (MCQs) is specifically written to help surgical trainee candidates prepare for Part One of the FRCS general surgery exit examination, which features MCQs on general surgery. The book helps candidates gauge the types of questions likely to be asked and the extent of preparation required for this examination. The wide range of surgical topics covered, including general surgery and emergency surgery in addition to endocrine, vascular, upper GI, hepatobiliary, colorectal and transplant surgery, also makes it a useful revision text for MRCS examination candidates.
