### Recent Developments in Foresight Methodologies - Maria Giaoutzi 2012-11-28

Foresight is an area within Futures Studies that focuses on critical thinking concerning long term developments, whether within the public sector or in industry and management, and is something of a sub-section of complexity and network science. This book examines developments in foresight methodologies and relates in its greater part to the work done in the context of the COSTA22 network of the EU on Foresight Methodologies. Foresight is a professional practice that supports significant decisions, and as such it needs to be more assured of its claims to knowledge (methodology). Foresight is practiced across many domains and is not the preserve of specialized 'futurists', or indeed of foresight specialists. However, the disciplines of foresight are not well articulated or disseminated across domains, leading to re-inventions and practice that does not make best use of experience in other domains. The methodological development of foresight is an important task that aims at strengthening the pool of the tools available for application, thereby empowering the actors involved in foresight practice. Elaborating further on methodological issues, such as those presented in the present book, enables the actors involved in foresight to begin to critique current practice from this perspective and, thirdly, to begin to design foresight practice. The present trends towards methodological concerns indicates a move from 'given' expert-predicted futures to one in which futures are nurtured through a dialogue among "stakeholders." The book has four parts, each elaborating on a set of aspects of foresight methodologies. After an introductory section, Part II considers theorizing about foresight methodologies. Part III covers system content issues, and Part IV

presents foresight tools and approaches.

*The context of natural forest management and FSC certification in Brazil*

- Claudia Romero 2015-12-30

Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

*Summit 1* - Joan Saslow 2017

With its fresh new look, the third edition of the Summit program helps develop confident English speakers who are able to navigate a host of social and professional situations. This two-level course provides high-intermediate learners with an integrated set of global communication skills. It delivers immediate, demonstrable results through its goal- and achievement-based pedagogy and continual recycling of language. The two levels of Summit can be used with Top Notch as the fifth and sixth books in a complete six-level series. Summit 1 covers competencies from B2 to B2+ and Summit 2 introduces C1 competencies in the Common European Framework of Reference. The entire Summit course can be tailored to blended learning with its integrated online component, MyEnglishLab (access code provided in the Student Book). Highlights New Conversation Activator videos build communicative competence. New Discussion Activator videos increase range and depth of expression. Test-taking Skills Booster and extra challenge exercises help students succeed on the reading and listening sections of standardized tests. Greatly increased grammar, reading, listening, and writing practice plus digital grammar exercises give students the additional practice opportunities they've requested. Memorable models build natural, social language and conversation strategies. 50+ listening tasks at each level develop critical thinking and crucial listening comprehension skills, such as listening for details, confirmation of content, inference, and understanding meaning. ActiveTeach includes a digital Student Book for whiteboards with lesson plans, assessment tools and access to audio, video, and exercises to make learning more focused and interactive. Fluency-building planning activities such as idea framing help students express themselves with confidence. More ready-to-use teacher resources (including a broad range of print and digital components) than other courses make Summit easy to use for busy teachers.
