Air Force Handbook 10-644 Survival Evasion Resistance Escape (SERE) Operations 27 March 2017 This handbook describes the various environmental conditions affecting human survival, and describes isolated personnel (IP) activities necessary to survive during successful evasion or isolating events leading to successful recovery. It is the fundamental reference document providing guidance for any USAF service member who has the potential to become isolated; deviations require sound judgment and careful consideration. This publication provides considerations to be used in planning and execution for effective mission accomplishment of formal USAF Survival, Evasion, Resistance, and Escape (SERE) training, environmentally specific SERE training, and combat survival continuation training programs. The tactics, techniques, and procedures in this publication are recognized best practices presenting a solid foundation to assist USAF service

members to maintain life and return with honor from isolating events.

U.S. Navy SEAL Guide to Survival Kits - Don Mann 2012-09-05

It's important to be prepared for any contingency, and you can do that by carrying a survival kit in your pack. Here, survival expert Don Mann explains the differences between survival kits for warm weather, cold climate, and overwater. Basic items for each are listed, as are the basic items that SEALs always take with them. Tips on how to prepare your kit and become familiar with its contents are covered. Mann also touches on basic food, water, shelter, fire-starting materials, first aid, and much more. Skyhorse Publishing is proud to publish a range of books for readers interested in military tactics and skills. We publish content provided by or of interest to the U.S. Army, Army Rangers, the U.S. Navy, Navy SEALs, the U.S. Air Force, the U.S. Marine Corps, and the Department of Defense. Our books cover topics such as survival, emergency medicine, weapons, guns, weapons systems, hand-to-hand combat, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Survival - United States Air Force 2020-10-09

This classic 1956 edition of the US Air Force Survival manual will be enjoyable reading for anyone interested in the Cold War, survival and the wilderness, or American cultural history. Viewers who enjoy movies like *Dr. Strangelove*, *Fail Safe*, and *Strategic Air Command* will find this a fascinating look into the mindset of the era's aviators. Survival under adverse conditions ranging up to hot war was a very real concern. Dozens of US aircraft were shot down during the Cold War. From the Foreword by General Nathan Twining: This Manual is designed for use of students in the Air Force survival training courses. It amplifies AFM 64-5, *Survival*, by including training information not covered in the kit edition because of weight and size of limitations. AFM 64-3 can also be used as a source book of survival information. It includes much detailed information which would have been beyond the intended scope of the smaller publication; it tells the reader not only what he must do but also why he must do it. Because of the global responsibilities of the United States Air Force, all Air Force personnel face the possibility of survival in a remote or desolate area of the world. It is the purpose of this Manual to prepare all personnel participating in flights on military aircraft for an intelligent approach to any possible survival situation. The reader is shown that nature and the elements are- neither friendly nor hostile and that the training and attitude he carries with him will determine his success in survival. The Manual opens with a discussion of the problems and techniques of general land survival: psy-chological problems, immediate action, camping and woodcraft, travel, clothing, signaling, food, and other related subjects. Then the ensuing chapters cover the special requirements for survival in the follow-ing areas: Arctic, desert, Tropics, sea, and sea ice.
