Microsoft Azure Essentials Azure Machine Learning - Jeff Barnes 2015-04-25

Microsoft Azure Essentials from Microsoft Press is a series of free ebooks designed to help you advance your technical skills with Microsoft Azure. This third ebook in the series introduces Microsoft Azure Machine Learning, a service that a developer can use to build predictive analytics models (using training datasets from a variety of data sources) and then easily deploy those models for consumption as cloud web services. The ebook presents an overview of modern data science theory and principles, the associated workflow, and then covers some of the more common machine learning algorithms in use today. It builds a variety of predictive analytics models using real world data, evaluates several different machine learning algorithms and modeling strategies, and then

deploys the finished models as machine learning web services on Azure within a matter of minutes. The ebook also expands on a working Azure Machine Learning predictive model example to explore the types of client and server applications you can create to consume Azure Machine Learning web services. Watch Microsoft Press's blog and Twitter (@MicrosoftPress) to learn about other free ebooks in the Microsoft Azure Essentials series.

He currently works as an independent author of Cisco certification resources and occasional instructor of Cisco authorized training for Skyline ATS. He has worked as a network engineer, consultant, systems engineer, instructor, and course developer. He is the author of several best-selling Cisco certification titles. He maintains lists of current titles, links to Wendell's blogs, and other certification resources at www.TheCertZone.com. This official study guide helps you master all the topics on the CCNP ROUTE exam, including: Network design, implementation, and verification plans EIGRP OSPF IGP Redistribution Policy-based routing and IP service-level agreement (IP SLA) BGP IPv6 IPv4 and IPv6 coexistence Routing over branch Internet connections This volume is part of the Official

Certification Guide Series from Cisco Press. Books in this series provide officially developed exam preparation materials that offer assessment, review, and practice to help Cisco Career Certification candidates identify weaknesses, concentrate their study efforts, and enhance their confidence as exam day nears.

Internal and External Narrative Generation Based on Post-Narratology: Emerging Research and Opportunities - Ogata, Takashi 2020-01-03 Narrative generation can be applied to systematic frameworks that cover theoretical and philosophical thoughts of narratives and narrative generation, analytical research of related narrative genres and narrative works, and narrative works writing and creation using narrative generation systems. The design and development of narrative generation systems refers to the themes regarding narrative work creation as arts and literature through narrative generation systems beyond narrative generation systems as a technology. Internal and External Narrative Generation Based on Post-Narratology: Emerging Research and Opportunities is an essential scholarly publication that explores the creation of narrative systems using practical frameworks and advanced narrative analysis. Highlighting a range of topics such as marketing, synthetic narrative, and application systems, this book is ideal for academicians, information technology professionals, designers, developers, researchers, and students.

POWER7 and POWER7+ Optimization and Tuning Guide - Brian Hall
2013-03-04

This IBM® Redbooks® publication provides advice and technical information about optimizing and tuning application code to run on systems that are based on the IBM POWER7® and POWER7+™ processors. This advice is drawn from application optimization efforts across many different types of code that runs under the IBM AIX® and Linux operating systems, focusing on the more pervasive performance opportunities that are identified, and how to capitalize on them. The technical information was developed by a set of domain experts at IBM. The focus of this book is to gather the right technical information, and lay out simple guidance for optimizing code performance on the IBM POWER7 and POWER7+ systems that run the AIX or Linux operating systems. This book contains a large amount of straightforward performance optimization that can be performed with minimal effort and without previous experience or in-depth knowledge. This optimization work can: Improve the performance of the application that is being optimized for the POWER7 system Carry over improvements to systems that are based on related processor chips Improve performance on other platforms The audience of this book is those personnel who are responsible for performing migration and implementation activities on IBM POWER7-based servers, which includes system administrators, system architects, network administrators, information architects, and database administrators (DBAs).

The Car Hacker's Handbook - Craig Smith 2016-03-01

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security

environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

On a Global Mission: The Automobiles of General Motors International Volume 3 - Louis F. Fourie 2016-12-27

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations

of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

IBM Tivoli Directory Server for z/OS - Karan Singh 2011-07-07

This IBM® Redbooks® publication examines the IBM Tivoli® Directory Server for z/OS®. IBM Tivoli Directory Server is a powerful Lightweight Directory Access Protocol (LDAP) infrastructure that provides a foundation for deploying comprehensive identity management applications and advanced software architectures. This publication provides an introduction to the IBM Tivoli Directory Server for z/OS that provides a brief summary of its features and an examination of the possible deployment topologies. It discusses planning a deployment of IBM Tivoli Directory Server for z/OS, which includes prerequisites, planning considerations, and data stores, and provides a brief overview of the configuration process. Additional chapters provide a detailed discussion of the IBM Tivoli Directory Server for z/OS architecture that examines the supported back ends, discusses in what scenarios they are best used, and provides usage examples for each back end. The discussion of schemas breaks down the schema and provides guidance on extending it. A broad discussion of authentication, authorization, and security examines the various access protections, bind mechanisms, and

transport security available with IBM Tivoli Directory Server for z/OS. This chapter also provides an examination of the new Password Policy feature. Basic and advanced replication topologies are also covered. A discussion on plug-ins provides details on the various types of plug-ins, the plug-in architecture, and creating a plug-in, and provides an example plug-in. Integration of IBM Tivoli Directory Server for z/OS into the IBM Workload Manager environment is also covered. This publication also provides detailed information about the configuration of IBM Tivoli Directory Server for z/OS. It discusses deploying IBM Tivoli Directory Server for z/OS on a single system, with examples of configuring the available back ends. Configuration examples are also provided for deploying the server in a Sysplex, and for both basic and advanced replication topologies. Finally it provides guidance on monitoring and debugging IBM Tivoli Directory Server for z/OS.

Junkers JU 87 Stuka Owners' Workshop Manual - Jonathan Falconer
2018-02-20

With its cranked wing and vulture-like looks the Junkers Ju 87 Stuka dive-bomber came to symbolise the terror of the German Blitzkrieg. In the early years of the Second World War the Ju 87 lived up to its fearsome reputation, but it eventually met its match when pitted against more modern adversaries. Supported by a comprehensive selection of photographs and technical drawings, Jonathan Falconer's Junkers JU 87 Stuka Manual describes the design, construction and operation of the feared Stuka, which saw frontline action wherever the German Army went - from Norway, western Europe and Russia, to North Africa.

High Resolution Infrared Spectroscopy in Astronomy - Hans Ulrich Käufel 2005-07-18

Two specialized new instruments for ESO's VLT, VISIR and CRIRES, spawned the idea for this workshop. CRIRES is a dedicated very high resolution infrared spectrograph; VISIR features a high resolution spectroscopic mode. Together, the instruments combine the sensitivity of an 8m-telescope with the now well-established reliability of VLT-facility instruments. High resolution here means that lines in cool stellar atmospheres and HII-regions can be resolved. The astrophysical topics discussed in this rather specialized workshop range from the inner solar

system to active galactic nuclei. There are many possibilities for new discoveries with these instruments, but the unique capability, which becomes available through high-resolution infrared spectroscopy, is the observation of molecular rotational-vibrational transitions in many astrophysical environments. Particularly interesting and surprising in this context, many papers on modeling and laboratory spectroscopy at the workshop appear to indicate that astronomical observations are lagging a bit behind in this field. The papers are an interesting mix of reports from existing high resolution facilities, reports on modeling efforts of synthetic spectra and reports on laboratory spectra. In this sense, a fruitful exchange between molecular physics and astronomy was again accomplished and is documented in this volume.

FUKUSHIMA - IM SCHATTEN - Juergen Oberbaeumer 2014-03-13
Der vorliegende Band FUKUSHIMA - IM SCHATTEN "Katastrophe und Flucht" ist der erste Teil von drei Buechern und behandelt die Tage vom 11. Maerz 2011 bis zum 18. Maerz 2011 im Spiegel meiner Reflexionen. Auszugsweise wurde dieser Text veroeffentlicht als OAG-Taschenbuch Nr. 97 "Japan an jenem Tag - Augenzeugenberichte zum 11. Maerz 2011" Hg. Albrecht Rothacher im IUDICIUM-Verlag. Alle Rechte liegen beim Autor Teil 2 FUKUSHIMA - IM SCHATTEN "Ein schwach verstrahltes Jahr" und Teil 3 FUKUSHIMA - IM SCHATTEN "Fallout" werden in Kuerze veroeffentlicht. Ich lebe mit meiner japanischen Frau seit 1984 in Japan, seit 1986 im Fischerort Yotsukura, 33 Kilometer vom AKW Dai-ichi entfernt, wo wir auch den 11. Maerz 2011 erlebten: Erdbeben, Tsunami und Radioaktivitaet. Die Woche vom 11. Maerz bis zur Ankunft am Flughafen Muenster-Osnabrueck gibt den Stoff ab fuer Teil 1 meines Manuskripts: Katastrophe und Flucht. Darin versuche ich ein Bild unseres Umfelds hier im Ort zu schildern, was ein anderes Japan-Bild entwirft als das Uebliche und die Ereignisse vom elften Maerz in einen inneren Zusammenhang zu bringen. Von den Erlebnissen einer Irrfahrt ausgehend, informiere ich ueber die Geschehnisse besonders am AKW, wobei ich besonders Tepco und die Regierung massiv kritisiere: aber auch den Lebensstil unserer Konsumkultur, der ja letzten Endes Atomstrom ermoeglichte bzw. verlangte. Es werden auch beispielhaft

Schicksale einiger Freunde in kurzen Ausschnitten gezeichnet. Waehrend des Schreibens bebt es - auch das ist Teil des Berichtes der dadurch etwas sehr Aktuelles erhaelt. Solche Aspekte des Ungluecks werden in Einblendungen wie Mosaiksteinchen in den Spannungsbogen eingesetzt. Ich moechte durch einen sehr direkt ansprechenden Erzaehlton in verschiedenen Sprachebenen von sachlich ueber gehoben und sogar lyrisch bis andererseits drastisch den Leser in eine Welt von dramatischer Aktion und Reflexion einbeziehen.

Austin Healey 100-6 & 3000 - Graham Robson 2016-01-12

In nine eventful years - 1957 to 1965 - the six-cylinder-engined Austin Healey evolved into a formidable and increasingly specialised rally car. By any standards, it was the first of the "homologation specials" - a type made progressively stronger, faster, more versatile, and more suitable for the world's toughest International rallies. Though the motorsport foundations had been laid by the Healey Motor Co. Ltd, the work needed to turn these cars into rock-solid 210bhp projectiles was almost all completed by the world-famous "works" BMC Competitions Department at Abingdon. It was because of their vast experience that the "Big Healeys" as they were always affectionately known - became fast and tough, nimble yet durable, so that they were capable of winning major events wherever traction could be assured. Not only did the "works" Austin Healeys win some of the world's most famous events - including Liege-Sofia-Liege, Spa-Sofia-Liege and the French and Austrian Alpine rallies, but they were also supremely fast on events like the Tulip, and came so close, so often, to winning their home event, the British RAC Rally, which traditionally ended the season. Not only did these cars turn their drivers - Pat Moss, Donald Morley, Rauno Aaltonen, Timo Makinen and Paddy Hopkirk among them - into heroes, but individual cars seemed to take on a character and reputation of their own. This book lists each

and every success, each and every notable car, and traces exactly how the machinery developed, and improved, from one season to the next. Over time, the "works" cars not only adopted aluminium cylinder heads and body panels, much-modified chassis, transmission and exhaust systems, but they also became supremely strong and could withstand a true battering on the world's toughest events. This book relates how the cars were improved by the engineers, how the drivers came to love their heavy and sometimes self-willed steeds, and how the management team got the most out of everything - machinery, personnel, drivers, and regulations. . Heavily illustrated and packed with technical detail this book will make a welcome addition to any motorsport fans library.

The Trans-Neptunian Solar System - Dina K. Prialnik 2019-11-28

The Trans-Neptunian Solar System is a timely reference highlighting the state-of-the-art in current knowledge on the outer solar system. It not only explores the individual objects being discovered there, but also their relationships with other Solar System objects and their roles in the formation and evolution of the Solar System and other planets. Integrating important findings from recent missions, such as New Horizons and Rosetta, the book covers the physical properties of the bodies in the Trans-Neptunian Region, including Pluto and other large members of the Kuiper Belt, as well as dynamical indicators for Planet 9 and related objects and future prospects. Offering a complete look at exploration and findings in the Kuiper Belt and the rest of the outer solar system beyond Neptune, this book is an important resource to bring planetary scientists, space scientists and astrophysicists up-to-date on the latest research and current understandings. Provides the most up-to-

date information on the exploration of the Trans-Neptunian Solar System and what it means for the future of outer solar system research Contains clear sections that provide comprehensive coverage on the most important facets of the outer Solar System Includes four-color images and data from important missions, including New Horizons and Rosetta Concludes with suggestions and insights on the future of research on Trans-Neptunian objects

The 30th SIAR International Congress of Automotive and Transport Engineering - Ilie Dumitru 2019-10-15

This proceedings book includes papers that cover the latest

developments in automotive vehicles and environment, advanced transport systems and road traffic, heavy and special vehicles, new materials, manufacturing technologies and logistics and advanced engineering methods. Authors of the papers selected for this book are experts from research, industry and universities, coming from different countries. The overall objectives of the presentations are to respond to the major challenges faced by the automotive industry, and to propose potential solutions to problems related to automotive technology, transportation and environment, and road safety. The congress is organized by SIAR (Society of Automotive Engineers from Romania) in cooperation with SAE International. The purpose is to gather members from academia, industry and government and present their possibilities for investigations and research, in order to establish new future collaborations in the automotive engineering and transport domain. This proceedings book is just a part of the outcomes of the congress. The results presented in this proceedings book benefit researchers from academia and research institutes, industry specialists, Ph.D. students and students in Automotive and Transport Engineering programs.
