CURRICULUM REFORM IN PAKISTAN - Amna Afreen
2022-02-25

I have written this book in an

effort to explore how the history of Pakistan has resulted in the critical problems weighing down its education system. The book examines the questions: Why and how has a small elite class come to rule Pakistan? And how has their rule worsened the country's problems? The focus will be to critically examine the elements of the Pakistani national curriculum and madrasas and their effects on Pakistani society. The book represents the fusion of my experiences in Pakistan with extensive literature analysis, interviews, and textbook analysis. This research began when I came to the United States in January 2015 through the SAR program. I wanted to know the answers to profoundly unsettling questions. How can a society be so intolerant that a scholar educated solely in Pakistan is disregarded and assassinated while many Western-educated scholars with traditional insular thoughts are not only appreciated but flourishing? I wanted to know why Pakistani

elites have so much power and freedom while lower classes are profoundly oppressed. Elites who barely pay taxes have been in power for generations while those that pay taxes suffer from sky-high inflation. The influential religious leaders mostly belong to the elite class while their followers are mostly lower class. Ruling families and social classes mostly control appointed positions. Do those in power not have a responsibility to speak on issues of social justice rather than limiting themselves in claiming that theirs is the only true form of Islam? Why don't they work to end the disparity of quality education between classes in Pakistan? Instead, many elites run their own lucrative elite Islamic schools. More importantly, why do the ulama (which literally means "those who possess knowledge [ilm], particularly of Islam") maintain a tight hierarchical system in the madrasa (Islamic seminary) community that rarely allows poor intelligent students to attain leadership

positions? Why are the ulama silent in the face of ruthless murder of and discrimination against Pakistani minorities? Book Review: "Pakistan Educational Reforms is a major study of education in Pakistan and its national and madrasa curriculum that fosters national and religious sectarian divisions, intolerance and conflicts. Dr. Amna Afreen documents the political, socio-economic and religious causes- limited government funding, widespread poverty and illiteracy and the poor training and performance of teachers- that have produced a failed educational system at urban and rural government and religious schools (madrasa) and offers a series of potential solutions and reforms." -- John L. Esposito, University Professor and Founding Director of The Alwaleed Center for Muslim-Christian Understanding, Georgetown University.

The Count of Monte Cristo -

author Alexandre Dumas. It is one of the author's most popular works, along with *The Three Musketeers*. Like many of his novels, it is expanded from plot outlines suggested by his collaborating ghostwriter Auguste Maquet. The story takes place in France, Italy and islands in the Mediterranean during the historical events of 1815–1838. It begins from just before the Hundred Days period (when Napoleon returned to power after his exile) and spans through to the reign of Louis-Philippe of France. The historical setting is a fundamental element of the book. An adventure story primarily concerned with themes of hope, justice, vengeance, mercy and forgiveness, it focuses on a man who is wrongfully imprisoned, escapes from jail, acquires a fortune and sets about getting revenge on those responsible for his imprisonment. However, his plans have devastating consequences for the innocent as well as the guilty. In addition, it is a story that

involves romance, loyalty, betrayal and selfishness, shown throughout the story as characters slowly reveal their true inner nature. The book is considered a literary classic today. According to Luc Sante, "The Count of Monte Cristo has become a fixture of Western civilization's literature, as inescapable and immediately identifiable as Mickey Mouse, Noah's flood, and the story of Little Red Riding Hood."

Why Nations Fail - Daron Acemoglu 2013-09-17

Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other

African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics

that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas

on the interplay between inclusive political and economic institutions? Why Nations Fail will change the way you look at—and understand—the world.

The Shias of Pakistan - Andreas Rieck 2016-01-15

The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia- Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and

whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class, of religious schools and rivalry between "orthodox" "ulama" and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.

Although La Monte Young is one of the most important composers of the late twentieth century, he is also one of the most elusive. Though loosely structured upon the chronology of the composer's career, this book takes a multi-disciplinary approach that combines biography, musicology, ethnomusicology, and music analysis.

A History of Ambition in 50 Hoaxes (History in 50) - Gale

Eaton 2016-09-06

What do the Trojan Horse, Piltdown Man, Keely Motor

Company, and Ponzi Scheme have in common? They were all famous hoaxes, carefully designed and bolstered with false evidence. The con artists in this book pursued a variety of ambitions—making money, winning wars, mocking authority, finding fame, trading an ordinary life for a glamorous one—but they all chose the lowest, fastest road to get there. Every hoax is a curtain, and behind it is a deceiver operating levers and smoke machines to make us see what is not there and miss what is. As P.T. Barnum knew, you can short-circuit critical thinking in any century by telling people what they want to hear. Most scams operate on a personal scale, but some have shaped the balance of world power, inspired explorers to sail uncharted seas, derailed scientific progress, or caused terrible massacres. A HISTORY OF AMBITION IN 50 HOAXES guides us through a rogue's gallery of hustlers, liars, swindlers, imposters, scammers, pretenders, and cheats. In Gale Eaton's wide-

ranging synthesis, the history of deception is a colorful tour, with surprising insights behind every curtain. Fountas & Pinnell Level Z+

The Prisoner of Zenda Illustrated - Anthony Hope
2021-01-27

The Prisoner of Zenda (1894), by Anthony Hope, is an adventure novel in which the King of Ruritania is drugged on the eve of his coronation and thus is unable to attend the ceremony. Political forces within the realm are such that, in order for the king to retain the crown, his coronation must proceed. Fortuitously, an English gentleman on holiday in Ruritania who resembles the monarch is persuaded to act as his political decoy in an effort to save the unstable political situation of the interregnum. Authenticity in Materials Development for Language Learning - Alan Maley

2017-11-06

This volume makes a unique contribution to the literature on materials development for language learning. It focuses on issues related to authenticity in materials development and includes research-based position statements, applications of theory to practice and developments of theory from observed practice. Each paper concentrates on a different aspect of authenticity and many of them introduce the reader to previously unexplored facets of authenticity. The chapters are sequenced so that the book moves from general discussion about the value of authenticity to reports of evaluations of authenticity to reports of the exploitation of authenticity in specific learning contexts. Many questions are raised, much revealing data is reported and analysed, and many pedagogic suggestions are made. The contributions

here have been written so that they are of potential value to teachers, to materials developers, to post-graduate students and to researchers. They are written to be academically rigorous, but at the same time to be accessible to newcomers to the field and to experienced experts alike.

The Sufi Paradigm and the Makings of a Vernacular Knowledge in Colonial India

- Michel Boivin 2020-06-01

This book demonstrates how a local elite built upon colonial knowledge to produce a vernacular knowledge that maintained the older legacy of a pluralistic Sufism. As the British reprinted a Sufi work, Shah Abd al-Latif Bhittai's Shah jo risalo, in an effort to teach British officers Sindhi, the local intelligentsia, particularly driven by a Hindu caste of professional scribes (the Amils), seized on the moment to promote a transformation from traditional and popular Sufism (the tasawuf) to a Sufi culture (Sufiyani saqafat). Using modern tools, such as the printing press, and borrowing European vocabulary and ideology, such as Theosophical Society, the intelligentsia used Sufism as an idiomatic matrix

that functioned to incorporate difference and a multitude of devotional traditions—Sufi, non-Sufi, and non-Muslim—into a complex, metaphysical spirituality that transcended the nation-state and filled the intellectual, spiritual, and emotional voids of postmodernity.

The Scientific Outlook -

Bertrand Russell 2017-09-25

'A scientific opinion is one which there is some reason to believe is true; an unscientific opinion is one which is held for some reason other than its probable truth.' - Bertrand Russell One of Russell's most important books, this early classic on science illuminates his thinking on the promise and threat of scientific progress. Russell considers three questions fundamental to an understanding of science: the nature and scope of scientific knowledge, the increased power over nature that science affords, and the changes in the lives of human beings that result from new forms of science. With customary wit and clarity, Russell offers

brilliant discussions of many major scientific figures, including Aristotle, Galileo, Newton and Darwin. With a new introduction by David Papineau, King's College, London.

My Financial Career -

Stephen Leacock 2013-09-03

When a man receives a promotion and a raise, he finds himself forced to face an uncomfortable situation that he has avoided all his life: visiting a bank and opening a bank account. "My Financial Career" is representative of author Stephen Leacock's writing style in which he pokes fun at social absurdities and irrational behaviour. This short story was adapted into a short animated film in 1962, directed by Gerald Potterton. The film won the award for Best Animated Short at the San Francisco

International Film Festival that year and was nominated for Best Animated Short at the 36th Academy Awards in 1964.
